

Canadian precast producer becomes Easi-Set SLENDERWALL licensee

Officials at Easi-Set Industries (easiset.com) recently announced that Béton Préfabriqué du Lac Inc. of Alma, Québec, has begun production of Easi-Set's SLENDERWALL panels after Easi-Set officials completed training there in early June. The Canadian licensee has been an architectural precast concrete producer for more than 20 years, and operates multiple plants in Canada.

The company's first SLENDERWALL contract is a 10-story, mixed-used building in New York City.
